Participation in high school sports is not without risk. The student-athlete and parent/guardian acknowledge truthful answers to the above questions allows for a trained clinician to assess the individual student-athlete against risk factors associated with sports-related injuries and death. Florida Statute 1006.20 requires a student candidate for an interscholastic athletic team to successfully complete a preparticipation physical evaluation as the first step of injury prevention. This preparticipation physical evaluation shall be completed each year before participating in interscholastic athletic competition or engaging in any practice, tryout, workout, conditioning, or other physical activity, including activities that occur outside of the school year.

We hereby state, to the best of our knowledge, that our answers to the above questions are complete and correct. In addition to the routine physical evaluation required by Florida Statute 1006.20, and FHSAA Bylaw 9.7, we understand and acknowledge that we are hereby advised that the student should undergo a cardiovascular assessment, which may include such diagnostic tests as electrocardiogram (ECG), echocardiogram (ECHO), and/or cardio stress test. The FHSAA Sports Medicine Advisory Committee strongly recommends a medical evaluation with your healthcare provider for risk factors of sudden cardiac arrest which may include the special tests listed above.
